To Whom It May Concern,

Your Embedded Software Engineer job listing on LinkedIn really caught my eye -- I *genuinely* love your mission and commitment to affordable and accessible mobility!

After 2 years of experience writing RTOS C++ software for safety-critical locomotive control systems, as well as some experience in college with robotics, I think I could be a key player helping you at Glydways achieve your goals, based on the job description. If you take a look at my resume, I think you'll agree.

I really appreciate you taking the time to read this and giving me a chance at contributing to something that I'm really passionate about! Hope to hear from you soon.

Sincerely,

Daniel Wall
